With compact tankless and mini-tank products from Bosch, there is no limit to where you can have hot water. These hot water heaters are an ideal solution for remote locations and when you need hot water at a dedicated fixture:

- Garage, apartment, pool house, in-law suites
- Supplemental hot water for high-flow fixtures
- Hard to reach locations that need extra hot water
- Smaller properties and second homes
Bosch Tronic 5000 Series | WH36, WH27, WH17
Whole House Electric Tankless Water Heaters

Endless Hot Water for One Major Application at a Time

The compact and powerful Tronic 5000 Series electric whole house tankless water heaters can be installed virtually anywhere inside the home. They are 97% efficient with no stand-by loss and have modulating elements that ensure a constant output temperature for hot water comfort.

- WH36 will provide for a 2-3 bathroom home
- WH27 will provide for a 1-2 bathroom home
- WH17 will provide for a 1 bathroom home

- WH36 will provide for a 1-2 bathroom home
- WH27 will provide for a 1 bathroom home
- WH36 and WH27 will provide for a 1 bathroom home

Model WH17 is not recommended for whole house use in climates where average ground water temperature is less than 60°F.

Features
- Over 97% thermal efficiency
- Compact and lightweight
- Electronic flow sensor
- Element modulation provides a constant output temperature
- Filter screen on inlet
- New scale prevention technology
- Improved temperature stability & control
- 5 year limited warranty§

§ Copies of original warranties in their entirety are available at www.boschheatingandcooling.com

GPM Output @ Temperature Rise of
- 75°F: 3.6
- 60°F: 4.1
- 45°F: 5.4

Example: An inlet water temperature of 55°F and a desired water temperature of 120°F requires a temperature rise of 65°F.

ELECTRICAL REQUIREMENTS:

- * Specs are based on 240 V. Lesser voltage (220 V or 208 V) will result in reduced output.
- ** In Canada unit must be wired to a single breaker. AE Canada Kit required.
- § The WH36 requires 180 amp circuit protection through three 60 amp circuit breakers in the U.S. The home MUST have a minimum of 300 amp service.
- †† The WH27 requires 120 amp circuit protection through three 40 amp circuit breakers in the U.S. The home MUST have a minimum of 200 amp service.
- † The WH17 requires 80 amps circuit protection through two 40 amp circuit breakers in the U.S. The home MUST have a minimum of 150 amp service.

WATER CONNECTIONS:
The water lines both to the inlet & from the outlet must be copper or suitably rated stainless steel flex line for at least 1.5 feet from the water heater. Plastic or PEX type plumbing line materials are not suitable for connecting directly to the water heater.

Bosch Tronic 3000 | US12 - US3
Under-Sink Electric Tankless Water Heaters

Endless Hot Water for One Sink at a Time

Compact point-of-use / under-sink tankless water heaters are designed to provide an endless supply of hot water for kitchen and bathroom sinks. These units provide 99% efficiency with minimal stand-by loss and most models are equipped with high/low kW settings.

Note: All Bosch Tronic 3000 models require hard wiring.

Features
- 99% efficient with minimal stand-by loss
- Ultra compact and light weight, saving valuable space
- Copper heat exchanger with copper-sheathed heating elements
- Units can be mounted horizontally or vertically (except model US12)
- Model US12 features thermostatic control
- No temperature / pressure relief valve is necessary (subject to local codes)
- 5 year limited warranty

Bosch Tronic 3000T | ES8, ES4, ES2.5
Point-of-Use Electric Mini-Tank Water Heaters

Hot Water Where You Need It

The Bosch Tronic 3000T point-of-use electric mini-tanks are available in three sizes which can be wall-hung (bracket included) or floor-mounted.

**Easy installation.** Simply tap into the cold water line, provide electrical connection and install the water heater directly at the sink. Can be used alone to provide a small volume of water or installed inline with a central water heater near the point-of-use to eliminate the wait for hot water.

**Electrical Requirements**

- Volts (VAC): 120
- Amps: 12
- Connection Type: Hard Wired, Plug-In

**Features**

- Supplies up to 2 sinks at a time (ES8 model)
- Provides hot water quickly at point-of-use
- Compact, lightweight, space saving
- Thick CFC-free foam insulation maximizes energy efficiency
- Units can be wall / floor mounted (bracket included) with multi-directional mounting available (ES8 model only)
- Temperature / pressure relief valve included
- Glass-lined tank for long service life
- Models ES2.5 and ES4 have a simple 120 VAC plug-in connection
- 8 year limited warranty

Extraordinary performance, unrivaled energy efficiency.

**Relief Valve**

Relief valve is required; however it is not shown in above photo for clarity.

No more waiting for hot water. Ideal for stand-alone use or recirculation systems.
